FIG. 3A is a perspective view of the angled hemostat model 25.8 in its open position. The hemostat is shown in a perspective view, with the handles 111 and 112, the jaws 114 and 115, and the locking mechanism 116. The hemostat is shown in a perspective view, with the handles 111 and 112, the jaws 114 and 115, and the locking mechanism 116.

Fig. 6L is a perspective view of the device 500 in a closed position, showing the top surface 502 and the bottom surface 504. The device 500 is a dome-shaped structure with a central opening 508. The top surface 502 is defined by the upper portion of the dome, and the bottom surface 504 is defined by the lower portion of the dome. The central opening 508 is a circular opening in the center of the dome. The device 500 is shown in a closed position, with the top surface 502 and the bottom surface 504 meeting at the central opening 508. The device 500 is a dome-shaped structure with a central opening 508. The top surface 502 is defined by the upper portion of the dome, and the bottom surface 504 is defined by the lower portion of the dome. The central opening 508 is a circular opening in the center of the dome. The device 500 is shown in a closed position, with the top surface 502 and the bottom surface 504 meeting at the central opening 508.
